The Six Distinctive Features of CHiLO

A completely new online education system using eBooks.

Since ancient times, "a book" was used as a tool to distribute "knowledge" to the society. Now, it has changed into a form of an electronic book, making it possible to embed diverse interactive media. Compared to the traditional e-learning system, online education with eBooks will bring in many advantages: Enables learners to customize the eBooks according to their objective and/or knowledge, does not rely on specific system or vender, etc.

One Minute Lecture Video

You can embed an explanation video of about one minute on each page of the CHiLO Book. Why one minute? Allegedly, the average viewing time of most online learners is about one minute. Once it's downloaded on to your tablet or smart phone, you can study with it anytime anywhere, even in places with no internet access.

CHiLO Book 1

CHiLO Lecture 2

Virtual Class

You can access to SNSs such as Facebook and Google+, and also to the schools' original forums or bulletin boards. You can realize active learning through interactions with other learners and teaching staff.

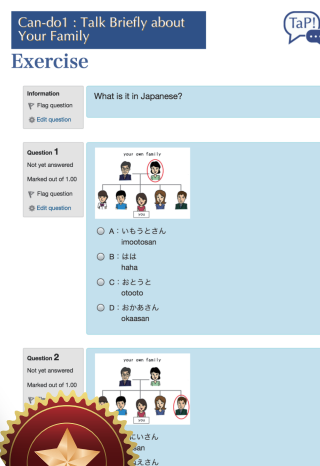

CHiLO Community 6

CHiLO Badge 3

Online Tests and Certificates

When you pass the online tests embedded in the CHiLO Book, digital badges will be issued. The badges are unalterable electronic certificates and can be used to certify learning results.

Digital Badge

CHiLO Analytics 5

Learning Logs and its Analytics

Linking up with existing LMS, you can take in the learners' learning progress in detail. Also

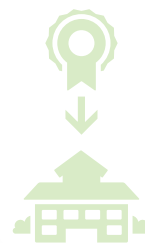

by linking up with Google analytics, you can analyze the learners' favorites, trends, and needs.

CHiLO Repository 4

Provision and Distribution

CHiLO Book is produced using a standard EPUB3 format, enabling it to be distributed through eBook stores such as iBooks Store and Google Play. Also, by utilizing the CHiLO Repository, you will be able to instantly find the CHiLO Book you want to study with.

CHiLO is adopted as an e-learning platform for OIJ-MOOC, Open University of Japan.
