

## 3. login.config

Original file comment [/\* ... \*/] out the LDAP setting.  
Please uncomment LDAP setting by following the instruction below.

```
ShibUserPassAuth {  
  
// Example LDAP authentication  
// See: https://wiki.shibboleth.net/confluence/display/SHIB2/IdPAuthUserPass  
/* */ ← Add comment end  
    edu.vt.middleware.ldap.jaas.LdapLoginModule required  
        ldapUrl="ldap://localhost"  
        baseDn="dc=sifulan,dc=asia"  
        ssl=false  
        userFilter="uid={0}" ← Remove ";" at the end of this line  
        subtreeSearch=true  
    ; ← Don't forget to add ";"  
/* */ ← Add comment begin
```
