

Serials Solutionsに関する情報

接続のお申し込み方法

SerialsSolutions の Client Center(アドミンサイト)において、
Credential-Based User Authentication Methodsの項目で

- Selected Authentication Method:でshibbolethを選択
- EntityId:で大学等機関のEntityID（不明な場合はIdP管理部署に確認）を登録

The screenshot shows the 'Configure User Authentication' interface. The 'User Authentication Settings' tab is active. Under 'IP Address & Referring URL Methods', 'IP Address' is checked. Under 'Credential-Based User Authentication Methods', 'Shibboleth' is selected. The 'Entity Id' field is populated with a URL and has a red asterisk indicating it is required. The 'IdP SSO Location' field is empty, and a red error message states: 'One or more configured endpoints requires the IdP SSO Location, but it has not been configured'. At the bottom, there is a table for attributes with columns 'Attribute Name' and 'Attribute Value', and a note: 'This profile has no Shibboleth attributes defined.'
