Configuring Permissions

This section explains how to edit a contributor's permissions after adding a project.

Open the main screen of the project that has the contributor whose permissions you wish to change.

Click 'Contributors' on the navigation bar at the top of the project's main screen to move to the contributors' management screen, and display the list of contributors.

Click the drop-down list to the right of the contributor's name and select a new permission.

After setting the permissions, click the 'Save Changes' button.
