

# Deleting a Project

When you delete a project, all folders and data in the project will be deleted. Please note that deleted projects cannot be undone.

Only the project administrator can delete a project. (Multiple project managers can be registered)

If there are components (child projects) in a project, the project cannot be deleted unless all the components (child projects) are deleted.

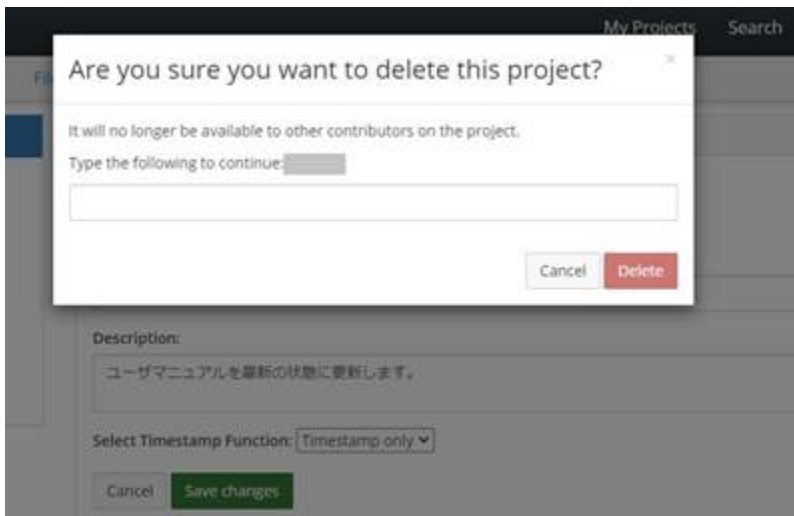

First, go to the main screen of the project you wish to delete.

Then click 'Settings' on the navigation bar to move to the project configuration management screen.

The screenshot shows the 'Project Settings' page in GakuNin RDM. The left sidebar contains navigation links: Project, Access Requests, Wiki, Contributors, Add-ons, Settings (highlighted), and Timestamp. The main content area is titled 'Project' and includes a 'Category (for descriptive purposes)' dropdown set to 'Project'. Below this are text input fields for 'Title' (containing 'ユーザマニュアル更新') and 'Description' (containing 'ユーザマニュアルを最新の状態に更新します。'). There is a 'Select Timestamp Function' dropdown set to 'Timestamp only'. At the bottom of this section are 'Cancel' and 'Save changes' buttons. A warning message states: 'A project cannot be deleted if it has any components within it. To delete a parent project, you must first delete all child components by visiting their settings pages.' Below this warning is a red 'Delete project' button. At the very bottom, there is an 'Access Requests' section with a checkbox labeled 'Allow users to request access to this project'.

Click the red 'Delete project' button in the project configuration field.

A modal window (child window) will appear confirming to delete the project.

The screenshot shows a modal window titled 'Are you sure you want to delete this project?'. The window contains the text 'It will no longer be available to other contributors on the project.' and a prompt 'Type the following to continue:' followed by a text input field. At the bottom right of the modal are 'Cancel' and 'Delete' buttons. The background shows a blurred view of the project settings page.

The authentication word will be displayed in the modal window (child window); please enter it in the text box.

Then click the 'Delete' button to delete the project.

You will be taken to your dashboard. You will see a green confirmation message at the top of the page.
