

In case of error

[日本語](#) / **English**

If an error occurs while using the JDCat analysis tool, please check the following.

- When creating a new analysis environment, has the number of analysis environments you already have reached the limit (10)? → Deleting an analysis environment
- Is the email address registered for your Orthros account an email address ending in **.ac.jp** or **.go.jp**? → Creating an Orthros account
 - To log in again with a different Orthros account, close all browser windows and try again. → Using an Orthros account
- Are you using a different Orthros account or a school-approved account in the same browser? → Use your browser's private window (secret window / InPrivate window).

Inquiry

If you are unable to resolve the issue, please email us with the following information.
